

/home/zeid/workspace/executor/src/database/PartsTray.h

```
graph BT; A["/home/zeid/workspace/executor/src/database/PartsTray.h"] --> B["/home/zeid/workspace/executor/src/database/PartsTray.cpp"]; A --> C["/home/zeid/workspace/executor/src/database/PartsTrayWithParts.cpp"];
```

The diagram illustrates a file dependency structure. At the top is a header file box labeled `/home/zeid/workspace/executor/src/database/PartsTray.h`. Below it are two source file boxes: `/home/zeid/workspace/executor/src/database/PartsTray.cpp` on the left and `/home/zeid/workspace/executor/src/database/PartsTrayWithParts.cpp` on the right. Blue arrows point from each source file box up to the header file box, indicating that both source files include the header file.

/home/zeid/workspace/executor/src/database/PartsTray.cpp
