

CanonicalMsg::setHeader

Controller::queueMsg

```
graph LR; A[Controller::queueMsg] --> B[CanonicalMsg::setHeader];
```

The diagram illustrates a function call. A box on the right labeled 'Controller::queueMsg' has a dark blue arrow pointing to a box on the left labeled 'CanonicalMsg::setHeader'. The 'CanonicalMsg::setHeader' box is shaded gray, while the 'Controller::queueMsg' box is white. Both boxes have a black border.
