

/home/zeid/workspace/executor/src/interpreter/database.h

```
graph BT; C1["/home/zeid/workspace/executor/src/interpreter/CanonicalRobotCommand.cc"] --> H["/home/zeid/workspace/executor/src/interpreter/database.h"]; C2["/home/zeid/workspace/executor/src/main.cc"] --> H;
```

The diagram illustrates a file dependency structure. At the top is a header file box labeled `/home/zeid/workspace/executor/src/interpreter/database.h`. Below it are two source file boxes: `/home/zeid/workspace/executor/src/interpreter/CanonicalRobotCommand.cc` on the left and `/home/zeid/workspace/executor/src/main.cc` on the right. Blue arrows point from each source file box up to the header file box, indicating that both source files include the header file.

/home/zeid/workspace/executor/src/interpreter/CanonicalRobotCommand.cc

/home/zeid/workspace/executor/src/main.cc
