

/home/zeid/workspace/executor/src/database/ShapeDesign.h

```
graph BT; A["/home/zeid/workspace/executor/src/database/ShapeDesign.h"] --> B["/home/zeid/workspace/executor/src/database/ShapeDesign.cpp"]; A --> C["/home/zeid/workspace/executor/src/database/StockKeepingUnit.cpp"];
```

The diagram illustrates a file dependency structure. At the top is a header file box labeled `/home/zeid/workspace/executor/src/database/ShapeDesign.h`. Below it are two source file boxes: `/home/zeid/workspace/executor/src/database/ShapeDesign.cpp` on the left and `/home/zeid/workspace/executor/src/database/StockKeepingUnit.cpp` on the right. Two blue arrows point from the source files up to the header file, indicating that both source files include the header file.

/home/zeid/workspace/executor/src/database/ShapeDesign.cpp

/home/zeid/workspace/executor/src/database/StockKeepingUnit.cpp
